EXPERIENCE

Software Engineer, 100Devs, *Remote*

July 2024 – Present

- Launched modern, responsive web apps, improving page load speed by 30% through image compression and optimized React rendering and backend APIs.
- Developed and maintained high-performance backends, delivering 40+ REST APIs with Node.js, Express, and MongoDB.
- Led front-end development using JavaScript and React, improving deployment speed and reducing UI bugs by 20%.
- Established secure authentication flows, protecting 100% of sensitive user data with Passport.js (Local Strategy)

Software Engineer, re-read (Open Source Project) (> 100 hours) – [Github Link](#) - [Live Project](#)

Oct 2025 – Present

- Initiated a peer-to-peer used book marketplace, reducing book costs by 30-50% by eliminating middlemen and enabling direct peer-to-peer listings.
- Built and developed a full-stack web application supporting 100+ book listings and users by implementing user authentication, book uploads, and search functionality.
- Improved platform stability and usability by delivering major features and bug fixes across 3 merged pull requests.
- Reduced failed login and account recovery attempts by 40% by implementing secure email verification and forgot-password workflows.

Software Engineer, Anuj Code Consulting, *Pathankot*

Oct 2024 – Aug 2025

- Collaborated with a UK-based developer to deliver a client project, implementing structured code reviews that enhanced feature reliability and reduced rework cycles by 30%.
- Built and deployed 3+ responsive websites, increasing client online traffic by 40-50% through improved design and user-friendly features.
- Provided technical consulting by advising on tech stack, architecture, enabling successful website launches.

EDUCATION

Guru Nanak Dev University, Amritsar

Sept 2023 - May 2025

Bachelors Of Science in Information Technology
